# Experience the cabriolet feeling...

**Protection against wind, rain and UV radiation – as well as a great fresh air feeling:** the pergola awning weinor PergoTex II is versatile to use and gives you more time outdoors. If you would like to enjoy the sun, just push a button – and the fabric retracts. If the weather takes a turn for the worse, just close the folding awning again. You are protected from the rain in no time – without leaving your patio.

... in the open air!

Enjoy openness and expanse at the touch of a button.

**100% outdoors!**

Enjoy the open air – the fabric retracts at the touch of a button.

**Elegant and extremely stable**

The high quality weinor PergoTex II folding awning resists winds of up to wind strength 6.

**A highly adaptable design**

A choice of over 200 frame colours.

**Attractive framework assembly**  
visually enhances the patio.

## Enjoy the al fresco life.

Is the weather good, and do you feel like sunning yourself under the blue sky and enjoying the gentle breeze? Then simply open the weinor PergoTex II.

### 100% rainproof!

The waterproof and highly stable PVC fabric provides reliable protection during poor weather. And it also looks great.\*

### Dimmable LED lighting

ensures a pleasant evening atmosphere.

All-glass elements for retrofitting provide sideways and frontal protection against the wind and weather.

# Whatever the weather!

Is the sun a little too bright, is it too hot, or is it starting to rain? No problem. Just close the roof. That way it's more pleasant in the evenings as well – with the dimmable LED lighting.

Controlled water drain via guttering and post.

\* With winds that have a wind strength of over 8 and with the risk of snow and ice, the awning has to be retracted.

# Pergona fabric collection

Pergona is the exclusive collection for weinor PergoTex II.  
Choose between Pergona classic and Pergona transluzent.

Sturdy, waterproof  
PVC-coated fabric

## Pergona classic

The weinor Pergona classic PVC-coated fabric guides rainwater away reliably. The fabrics are nearly opaque and therefore ideal for darkening the space. Dirty marks cannot be seen from underneath either.

## Pergona transluzent

The special feature of the weinor Pergona transluzent fabric is its high light transmission of up to 21 %. Natural light is able to penetrate the rainproof support fabric, but it prevents unpleasant dazzling by strong sunlight at the same time. High-strength polyester fibres make the woven fabric extremely durable, long-lived and weather-resistant.

# Make more of it!

Enhance your pergola awning weinor PergoTex II with clever constructions.

## All-glass element – more protection and light-flooded

A clear view and yet still protected:

The pergola awning weinor PergoTex II can be retrofitted with easy-glide sliding walls on all sides with little work. This provides you with added protection against the wind and weather. At the same time, the all-around transparency gives you the feeling of genuinely being outside.

Ease of operation:

The weinor easy-glide sliding wall is easy to open and close or to lock in place – depending on your personal wishes and the weather. Its intelligent actuator function ensures an exceptionally fast operation of all of the all-glass elements simultaneously.

Note: in combination with weinor PergoTex II, the all-glass elements have to be opened as far as possible with winds that have a wind strength of more than 6.

## Vertical awning – nice and small

The elegant VertiTex II vertical awning offers the optimum privacy and sun protection. Light and air permeable fabrics create a pleasant atmosphere. High quality technology consistently guarantees excellent deployment of the fabric – even with wide fabrics.

The small cassette in which the fabric is stored is especially impressive. This means you have a free and unhindered view outside without any annoying housings in sight. weinor PergoTex II can be quickly supplemented with VertiTex II with little work.

## Multi-section units – nice and large

The maximum size of weinor PergoTex II with two posts totals 7 x 6.5 metres. Larger areas can be equipped with adjacently positioned constructions without any problem.

## ... with accessories

Those who decide on the pergola awning weinor PergoTex II can be certain of enjoying their product for a long time. This is something weinor guarantees with its exceptionally high quality standards. And these naturally apply to the accessories as well.

### LED lighting

The integrated high-power LED spotlights bring a pleasant atmosphere to your patio. They are energy efficient and especially long lasting, and in combination with the weinor BiConnect radio control they are also dimmable.

### Tempura heating system

With the infrared heatings Tempura and Tempura Quadra you can use your patio for longer into the evening – also during the colder times of year. They bring pleasant, instant heat with no warm-up time. The Tempura and Tempura Quadra is dimmable, energy efficient and easy to operate.

Hand transmitter with display 15M Go! and BiEasy App

Hand transmitter with LED BiEasy 1M or 5M

### Radio control

The weinor BiConnect radio control makes operating sun protection, lighting and heating a delight. Using a pre-programmed BiEasy hand transmitter with or without a display, in silver or black, or also via an iPad or iPhone using the BiEasy app.

## ... with technical details

### Controlled rain drainage

weinor makes sure that you never get caught out in the rain. An intelligent water drainage construction guides the rain along the guttering, through the post and downwards.

The small fabric safety shield also provides for reliable water drainage with sideways gutters. A further benefit: the aluminium fabric safety shield is designed so that the noise made by the raindrops is kept as low as possible.

### Simple electrical connection

Leads can be installed via the guttering and post. This means add-on products such as radiant heaters, garden lighting or water pumps can be supplied with electricity easily.

#### Technical data of the weinor PergoTex II

Max. width	7 m
